

Walton Oak - Addition Calculation Policy

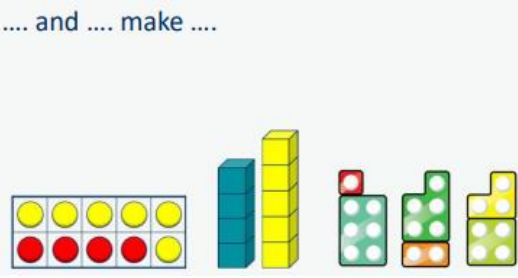

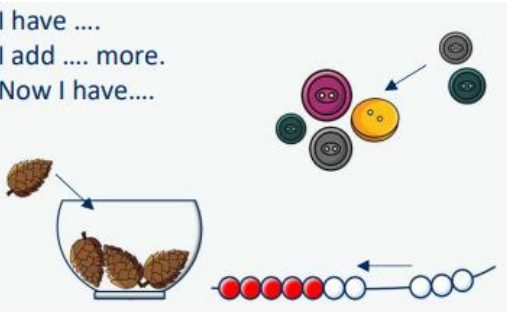

Key language: sum, total, parts and wholes, plus, add, altogether, more, 'is equal to' 'is the same as'.

Nursery	
Fluency	End of year expectations
<p>Subitise to 3 and instantly see how many</p> <p>Count how many – begin to count objects using 1-1 correspondence</p> <p>Make numbers to 5, start by showing 1,2 and 3 using fingers</p> <p>Add 1 more through stories, songs and rhymes</p>	<p>Begin to have an understanding of numbers to 5 - focusing on noticing and representing small quantities, perceptual subitising and counting.</p>

Objective and strategy	Key representations
Subitise to 3	<p>How many do you see?</p> 
Count how many	<p>How many are there?</p> <p style="text-align: center; color: red;">1 2 3 4 5</p>  <p>Count out ... from a larger group. E.g. Collect 3 beanbags for a game.</p>
Make numbers to 5	<p>Show me...</p>  <p>Begin to link numerals to quantities.</p>
Add 1 more	<p>How many do I have now?</p> 

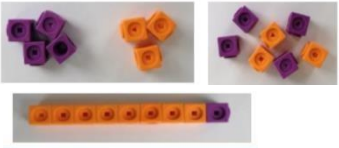

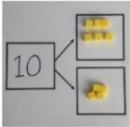

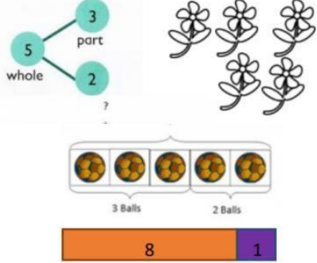

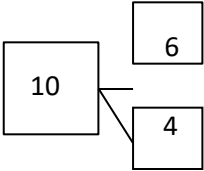

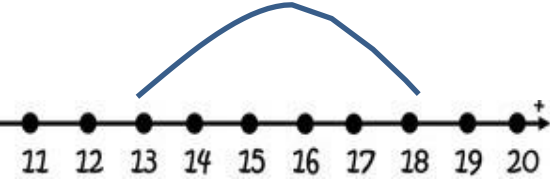

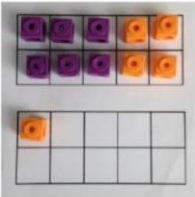

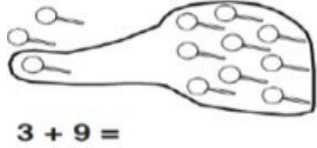

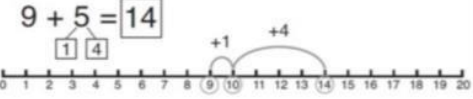

Reception	
Fluency	End of year expectations
<p>Have a deep understanding of numbers to 10, including the composition of each number</p> <p>Conceptually subitise to 5 and notice the parts that make up the whole</p> <p>1 more – continuing to link to stories, songs and rhymes</p> <p>Notice the composition of numbers within 10 and link to stories, songs and rhymes</p> <p>Combine 2 groups to find the total</p> <p>Automatically recall number bonds up to 5 and some number bonds up to 10, including double facts</p> <p>Add more showing when a quantity is increased</p>	<p>Have a deep understanding of numbers to 10, including the composition of each number.</p> <p>Subitise (recognise quantities without counting) up to 5</p> <p>Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 and some number bonds to 10, including double facts.</p>

Objective and strategy	Key representations
Conceptually subitise to 5	<p>What do you see? How do you see it?</p> 
1 more	<p>1 more than ... is ...</p> 
Notice the composition of numbers within 10	<p>How many...? How many...? How many altogether?</p>  <p>How many ways can you make...?</p>

<p>Combine 2 groups</p>	<p>There are There are There are altogether.</p> 	<p>.... and make</p> 
<p>Add more</p>	<p>First... Then.... Now....</p> 	<p>I have I add more. Now I have....</p> 

Year 1	
Fluency	End of year expectations
Count forwards, to and across 100, beginning with 0 or 10r from any given number	$O + O$ $TO + O$ Numbers up to 20 (including adding zero)
Switch count between tens and ones e.g. 10, 20, 30,31, 32, 33 ...	Children must experience combining two, and then more than two groups of objects using counting on and the language of addition e.g. add, plus, more
Represent and use number bonds up to 20 (establish addition and subtraction as related operations)	Children must experience increasing numbers e.g. what is two more than seven?
Find one more than a number Find ten more than a number	Compare quantities to say how many less and/or how many more
Read, write and interpret mathematical statements involving addition (+) and the equals (=) signs	Solve one-step problems that involve addition, using concrete objects and pictorial representations, and missing number problems such as $7 = _ + 2$
Add 1-digit and 2-digit numbers to 20, including zero	
Add together and add more	

Objective and strategy	Concrete (build it)	Pictorial (draw it)	Abstract (write it)
<p>Combining two parts to make a whole: part-whole model</p>	<p>Use a part - part whole model.</p>  <p>Use cubes to add two numbers together as a group or in a bar.</p> 	<p>Use pictures to add two numbers together as a group or in a bar.</p> 	<p>Use the part – part whole model to move into the abstract.</p> $10 = 4 + 6$ 
<p>Starting at the bigger number and counting on</p>	<p>Start with the larger number on the bead string and then count on to the smaller number 1 by 1 to find the answer.</p> 	<p>Start at the larger number on the number line and count on in ones or in one jump to find the answer.</p> 	<p>Place the larger number in your head and count on the smaller number to find your answer.</p> $5 + 12 = 17$
<p>Regrouping to make 10.</p> <p>This is an essential skill for column addition later.</p>	<p>Start with the bigger number and use the smaller number to make 10. Use ten frames.</p> $(6 + 5)$ 	<p>Use pictures or a number line. Regroup or partition the smaller number using the partpart whole model to make 10.</p>  $3 + 9 =$ 	<p>$7 + 4 = 11$</p> <p>If I am at seven, how many more do I need to make 10. How many more do I add on now?</p> <p>Children to develop an understanding of equality e.g. $6 + \square = 11$ $6 + 5 = 5 + \square$ $6 + 5 = \square + 4$</p>

**Represent & use
number bonds
and related
subtraction
facts within 20**

2 more than 5

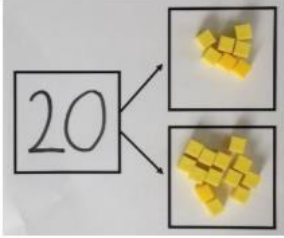

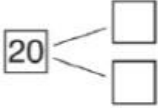

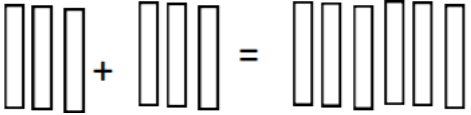

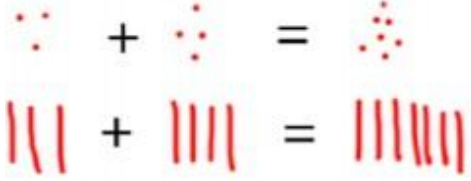

Emphasis should be on the
language

'1 more than 5 is equal to 6.'
'2 more than 5 is 7.'
'8 is 3 more than 5.'

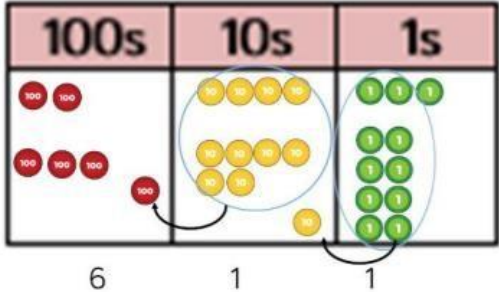

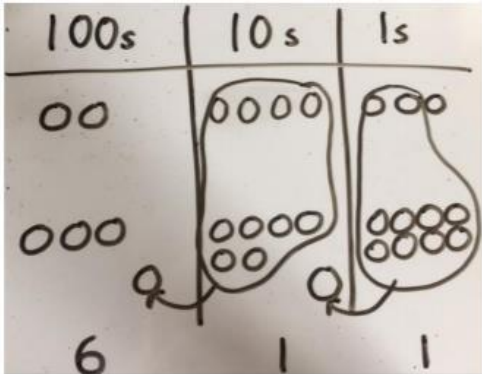

Year 2	
Fluency	End of year expectations
Show increasing fluency in deriving pairs of numbers up to 10 and then up to 20	Children should be able to partition numbers in different ways e.g., as $2+2+2+1$ or $5+3$ or 23 as $20 + 3$ or $10+13$
Add across a 10, add multiples of 10, add 10's to any number, add 2-digit numbers, add 2-digit numbers across 10.	TO + O TO + tens TO + TOO + O + O
Use knowledge to derive and use number facts up to 100	
Add ones to any number and make links to known facts	Children should use concrete objects, pictorial representations and add numbers in different contexts e.g., money, measures
Add three 1-digit numbers in any order	Children should understand the language of sum.
Add numbers mentally including: TO + O TO + tens TO + TOO + O + O	Ensure children understand that addition is commutative (can be done in any order)

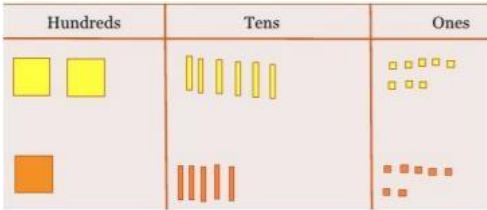

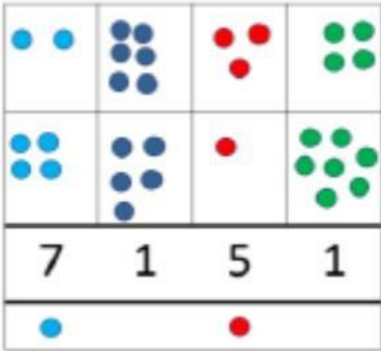

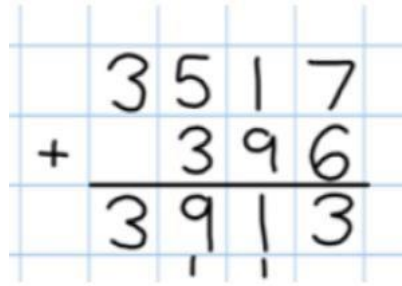

Objective and strategy	Concrete (build it)	Pictorial (draw it)	Abstract (write it)
Adding multiples of ten	Model using dienes and bead strings $50 = 30 + 20$ 	Use representations for base ten  $3 \text{ tens} + 5 \text{ tens} = \text{---} \text{ tens}$ $30 + 50 = \text{---}$	$20 + 30 = 50$ $70 = 50 + 20$ $40 + \square = 60$
Use known number facts Part part whole	Children explore ways of making numbers within 20 	 $\square + \square = 20$ $20 - \square = \square$ $\square + \square = 20$ $20 - \square = \square$	$\square + 1 = 16$ $16 - 1 = \square$ $1 + \square = 16$ $16 - \square = 1$
Using known facts	If I know that $3+3=6$, I also know that $30+30=60$ $\square \square + \square \square = \square \square \square \square$ 	Children draw representations of T and O 	$3 + 4 = 7$ <i>leads to</i> $30 + 40 = 70$ <i>leads to</i> $300 + 400 = 700$

<p>Bar model</p>			<table border="1" style="width: 100%; text-align: center;"> <tr> <td style="width: 50%;">23</td> <td style="width: 50%;">25</td> </tr> <tr> <td colspan="2">?</td> </tr> </table>	23	25	?	
23	25						
?							
<p>Add a two digit number and ones</p>	<p>TO + O using base 10. Continue to develop understanding of partitioning and place value. $41 + 8$</p>	<p>Children to represent the base 10 e.g. lines for tens and dot/crosses for ones</p>	<p>$41 + 8$</p> <p>$1 + 8 = 9$ $40 + 9 = 49$</p> <p>$1 + 8 = 9$ $40 + 9 = 49$</p>				
<p>Add a 2 digit number and tens</p>	<p>$25 + 10 = 35$</p> <p>Explore that the ones digit does not change</p>	<p>$27 + 30$</p> <p>$+10 +10 +10$</p> <p>27 37 47 57</p>	<p>$27 + 10 = 37$</p> <p>$27 + 20 = 47$</p> <p>$27 + \underline{\quad} = 57$</p>				
<p>Add two 2-digit numbers</p>	<p>TO + TO using base 10. Continue to develop understanding of partitioning and place value. $36 + 25$</p>	<p>Children to represent the base 10 in a place value chart</p>	<p>Looking for ways to make 10.</p> <p>$36 + 25 =$</p> <p>1 5</p> <p>$30 + 20 = 50$ $5 + 5 = 10$ $50 + 10 + 1 = 61$</p>				

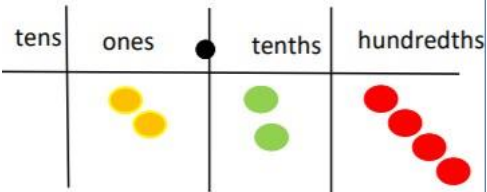

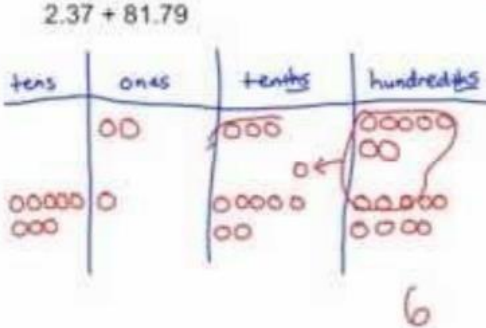

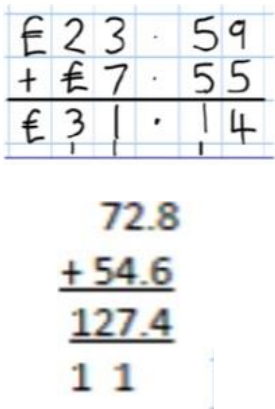

Year 3	
Fluency	End of year expectations
<p>Count in ones, tens and hundreds maintaining fluency through varied and frequent practice (forwards and backwards)</p> <p>Count from 0 in multiples of 4, 8, 50 and 100 Find</p> <p>10 or 100 more than a number</p> <p>Mentally add HTO + ones, HTO + tens, HTO + hundreds</p> <p>Perform mental calculations with two-digit numbers, the answer could exceed 100</p> <p>Complements to 100</p>	<p>Add numbers with up to three-digits (leading to formal written column method)</p> <p>Solve problems in different contexts including missing number problems</p> <p>Children should partition numbers, up to 1000, in different ways e.g. $100 + 40 + 6$ or $100 + 30 + 16$</p> <p>Add fractions with the same denominator within 1 whole</p> <p>Calculate the time taken by particular events or tasks</p>

Objective and strategy	Concrete (build it)	Pictorial (draw it)	Abstract (write it)
Column Addition	<p>Use of place value counters to add HTO + TO, HTO + HTO etc. When there are 10 ones in the 1s column- we exchange for 1 ten, when there are 10 tens in the 10s column- we exchange for 1 hundred.</p> 	<p>Children to represent the counters in a place value chart, circling when they make an exchange.</p> 	<p>Move on to the formal column method of addition. Add the ones first, then the tens, then the hundreds.</p> $ \begin{array}{r} 243 \\ +368 \\ \hline 611 \\ \hline 11 \end{array} $

Year 4	
Fluency	End of year expectations
Count in 6s, 7s, 9s, 25s and 100s Find 1000 more than a number Perform mental calculations with increasingly largenumbers to aid fluency Add 1s, 10s and 100s to a 4-digit number Count backwards through 0 to include negative numbers	Add numbers with up to four-digits (formal written column method) Solve two-step problems in different contexts including missing number problems Add fractions and mixed numbers with the same denominator beyond 1 whole Solve simple measure and money problems involving fractions and decimals to 2 decimal places

Objective and strategy	Concrete (build it)	Pictorial (draw it)	Abstract (write it)
Add numbers with up to 4 digits	Children continue to use dienes or place value counters to add, exchanging ten ones for a ten and ten tens for a hundred and ten hundreds for a thousand. 	Draw representations using place value grid. 	Continue from previous work to carry hundreds as well as tens. Relate to money and measures. 

Year 5	
Fluency	End of year expectations
Count forwards in powers of ten up to 100000 Count forwards in positive and negative whole numbers through zero Practise mental calculations with increasingly large numbers Practise fluency of written methods	Add numbers with more than four-digits (formal written column method) Solve multi-step problems selecting and justifying methods Practise mental calculations with increasingly large numbers Add fractions with denominators that are a multiple of one another Add decimals with up to 2 decimal places

Objective and strategy	Concrete (build it)	Pictorial (draw it)	Abstract (write it)
Add decimals with 2 decimal places, including money.	Introduce decimal place value counters and model exchange for addition.  <p>A decimal place value chart with columns for tens, ones, tenths, and hundredths. A black dot is placed on the vertical line between the ones and tenths columns. Two yellow circles are in the ones column, two green circles are in the tenths column, and four red circles are in the hundredths column.</p>	 <p>A pictorial representation of the addition $2.37 + 81.79$. It shows a place value chart with columns for tens, ones, tenths, and hundredths. The number 2.37 is represented by two tens rods, three one rods, and seven one-tenth rods. The number 81.79 is represented by eight ten rods, one one rod, seven one-tenth rods, and nine one-hundredth rods. The total is shown as one ten rod, one one rod, six one-tenth rods, and four one-hundredth rods. A bracket groups the six one-tenth rods and one one rod, with an arrow pointing to a six one rod, indicating an exchange.</p>	 <p>Abstract representation of the addition $2.37 + 81.79$ using money. It shows a grid with columns for pounds and pence. The first row is £23.59, the second row is + £7.55, and the third row is £31.14. Below this, the addition is shown in a standard column format: $72.8 + 54.6 = 127.4$.</p>

Year 6	
Fluency	End of year expectations
Count in tens and hundreds increasing fluency of order and place value	Add numbers with more than four-digits (formal written column method)
Perform increasingly complex mental calculations and those with increasingly large numbers to aid fluency	Solve more complex calculations mentally
Add integers up to 10 million	Add decimals with up to 3 decimal places
	Add fractions with different denominators
<p>Children should extend the carrying method to number with any number of digits. Using similar methods, children will</p> <ul style="list-style-type: none"> • add several numbers with different numbers of digits; • begin to add two or more decimal fractions with up to four digits and either one or two decimal places; • know that decimal points should line up under each other, particularly when adding or subtracting mixed amounts, e.g. $401.2 + 26.85 + 0.71$. 	

Objective and strategy	Concrete (build it)	Pictorial (draw it)	Abstract (write it)
<p>Add several numbers of increasing complexity</p> <p>Including adding money, measure and decimals with different numbers of decimal points.</p>	As Year 4/5	As Year 4/5	<p>Insert zeros for place holders.</p>
